

## Postsecondary Education and Employment for Youth with Autism after High School

**8 EXPERIENCED  
UPWARD MOBILITY**

**10 REMAINED IN THE SAME  
ACTIVITY SINCE HIGH SCHOOL**

**18 EXPERIENCED A DISRUPTION IN  
EDUCATION OR EMPLOYMENT**

Taylor, J. L., & DaWalt, L. S. (2017). Brief Report: Postsecondary Work and Educational Disruptions for Youth on the Autism Spectrum. *Journal of autism and developmental disorders*, 47(12), 4025-4031

### Among the 36 youth with autism spectrum disorder (ASD)...

- **10 people** remained in the same activity since high school.
- **8 people** experienced upward mobility (*either "becoming employed while maintaining enrollment in postsecondary education, taking a few classes to being a full time student, going from a sheltered pre-vocational setting to a supported job or going from no activities to a supported job"*) after high school.
- **16 people** experienced a disruption in education or employment.
- **2 people** did not participate in any of the reported activities after high school exit.

This material is based, in part, upon work supported by the National Science Foundation under Grant Number 1612090

Taylor, J. L., & DaWalt, L. S. (2017). Brief Report: Postsecondary Work and Educational Disruptions for Youth on the Autism Spectrum. *Journal of autism and developmental disorders*, 47(12), 4025-4031

**Half of the youth with autism did not experience any disruption in education or employment after high school.**

## Notes:

- **About half of the sample** either remained in the same educational situation or experience upward mobility.
- We urge caution when generalizing because this study relied on a relatively small sample of participants with similar demographics (mostly white males).
